## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **Detailed Action**

#### ***Drawings***

The Examiner accepts the drawings filed on January 31, 2001.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims **21-34** rejected under 35 U.S.C. 102(e) as being anticipated by Eastep (US 6,731,625).

Re claims **21, 25, 26, 29, and 32**, Anderson teaches a method of controlling access of a user to a service (abstract), the method comprising:

obtaining a first, transient identifier associated with a communication session of said user over an anonymous network (fig. 3);

obtaining a second identifier associated with persistent real-world information of said user from a network access provider (NAP) through which said user is connected

to said service, said second identifier associated with said first identifier at said NAP  
(col. 22, lines 45-68); and

controlling access based on said second identifier (col. 2, lines. 1-38).

Re claim **22**, Eastep teaches service is selected from the group consisting of e-mail service, electronic banking, financial service, and firewall (col. 72, lines 1-25).

Re claim **23**, Eastep teaches network is selected from the group consisting of an Internet network, a wireless data network, a cellular data network, and a CATV-based data network (col. 60, lines 1-60).

Re claim **24**, Eastep teaches evaluating the reliability of said second identifier based on predetermined criteria; and determining the level of access to provide to said user based on said reliability (col. 83-84).

Re claim **27**, Eastep teaches obtaining comprises receiving said account details from a network access provider servicing said user (figs. 19-21).

Re claims **28** and **33-34**, Eastep teaches account details pertain to at least one user below said predetermined age and further comprising: obtaining information associated with said account generally known only to adult users of said account; requesting said user to enter an at least generally significant part of said information; and reporting said user as an adult if said at least generally significant part matches the corresponding part of said information. 29. (previously presented): A method for handling telephone calls during a dial-up Internet connection, the method comprising: obtaining an identifier of a telephone line connecting a user to a data network from a network side of a connection between said user and said data network; associating said

Art Unit: 3691

identifier with information for contacting said user over said network; and configuring incoming telephone calls to said user according to said information (col. 101, lines 1-38).

Re claim **30**, Eastep teaches upon receiving said incoming call, sending notification of said incoming call to said user (figs. 12-15).

Re claim **31**, Eastep teaches forwarding said incoming call to said user over said network; forwarding said incoming call to said user over a telephone network; sending to said user information about the origin of said incoming call; and receiving from said user at least one order about how to handle said incoming call (figs.23-24.).
